**Potential competing interests:** No potential competing interests to declare.

The opinion piece "Decolonization of Health in East Africa: Opinion Piece" presents a perspective from the point of view of researchers who have been able to collaborate on initiatives for decolonization with a focus on providing parity in all domains and to all people, regardless of who they are, are and where they live. The authors discuss inequality in a clear and evident way and present the main points where strategies to mitigate this inequality can be strengthened.
