Potential competing interests: No potential competing interests to declare.

1. Abstract should include the focused content such as the optimization criteria.
2. More important keywords should be given those are not included in the title of the manuscript.
3. Why the Performance of Wastewater Treatment in few States of India is discussed?
4. In figure 2 some more information can be given else this is a generalized figure which is available in most of the books, journals, book chapters. So, make it different and informative.
5. Figure 4 is not provided.
6. Provide some more figure by describing the process of purification and related parameters.
7. Discuss about the mechanism of every individual processes.
8. Include the advantages and drawbacks of each process.
9. How to overcome the various issues that comes during processing of wastewater?
10. How to choose the process of purification for different types of wastewaters?
11. Provide a process flow diagram for the complete treatment process along with the operating variables.
12. How the advanced treatment processes are effective?
