This paper is very research-worthy. The research methodology of the paper is suitable and the paper is structured in a complete way. I can see that the author has done a lot of research work. This paper is a good paper. In addition, I have some suggestions:

- 1 The length of the paper could be reduced appropriately.
- 2 Some references are not very relevant to the paper and can be cut down some.
- 3 The discussion section can be compressed. It is a bit repetitive with the conclusion.

This paper as a whole is up to the level of publication. I think it can be published after making minor revisions.
