

# Review of: "Neuro-Fuzzy-Based Adaptive Control for Autonomous Drone Flight"

Lunan Zheng

Potential competing interests: No potential competing interests to declare.

- 1: Many of the symbols in this article are not uniform, and the format is confusing, such as  $p_a$  and  $p_d$ .
- 2: The description of its own controller in this paper is not sufficient, the specific controller form and parameters are not clearly described.
- 3: The comparison in this paper is not sufficient, and there is no data and curve to reflect the effect of the adaptive part.
