Potential competing interests: No potential competing interests to declare.

Review Result

1. Introduction : very specific on the company. The paper could have addressed global or local trend prior to focusing on the company
2. Literature review : I do not see a clear theoretical view on how the problem could be solved. It sounds very pragmatic/practical approach with no clarity on the theory.
3. Research method : The paper could have shown how the research is conducted as the conclusion is shown without a clarity on research process
4. Conclusion : I also did not see the research questions are answered as they were no clear indication of the RQs.

The paper could have been presented more from scientific perspective, if the authors follow the scientific research method. Keep on writing your papers!
