Potential competing interests: No potential competing interests to declare.

The article is good and deals with a topical and important issue in the world, both academically and professionally.

Overall, I think it is well presented and well researched. It contains a sound theoretical basis.

If I had to consider something, it would be the approach to the conclusions. Articles of this type should not contain pre-judgements, but rather provide information. It is a question of how it is presented. With this small detail, I think this research would be very useful.
