Subject: Constructive Feedback on the Working Paper Titled "Comprehensive Review"

Dear [Author's Name],

I hope this message finds you well. I would like to express my appreciation for the opportunity to review your working paper, which you have aptly referred to as a "comprehensive review." The thematic focus and relevance of your work are undeniably intriguing. However, I believe there is room for clarification regarding the transformational aspects of the subject matter under review.

The paper navigates through the intricacies of digital intelligence, personal digital inquiry, and digital literacy, delving into their conceptual frameworks. While these discussions are valuable, the interconnections between these concepts and their implications for the sustainable development of the region remain somewhat unclear. Providing a more explicit link between these conceptual discussions and their practical application within the context of regional development would greatly enhance the overall coherence of your paper.

Moreover, as I perused the conclusion of the paper, I found it challenging to discern a direct derivation from the content presented. Some segments of the text left me uncertain about the intended message, such as the passage highlighting the collective efforts of CLMTV in developing their policies and strategies. For instance, the statement, "CLMTV came together and identified a common agenda to develop their policies and strategies, despite being strategically located in the heart of Asia, with a fast-growing economy, cutting-edge infrastructure, abundant natural resources, and competent human capital," lacks clarity in conveying the author's intended meaning.

I believe that refining these aspects of your working paper will significantly strengthen its impact and contribute to a more coherent narrative. Your insights on these matters will undoubtedly contribute to the advancement of the discourse on the intersection of digital concepts and regional sustainable development.

Thank you for considering these suggestions, and I look forward to witnessing the continued refinement of your valuable work.

Best regards,

Jitendra Kumar Sinha, Retired from the Government of Bihar, India (jksinha2007@rediffmail.com)
