

Peer Review

Review of: "Human Metapneumovirus: What We Know So Far – A Mini Review"

Stefania Marsico¹

1. DFSSN, University of Calabria, Italy

The mini-review is clear and understandable, but the title does not reflect the content of the article. The authors have not fully described everything that is known about HMPV, but have only analyzed some studies done in Taiwan and Indonesia. So it would be correct to propose another title.
