Potential competing interests: No potential competing interests to declare.

I have reviewed the article sent for evaluation and appreciated your work. It is a very well-presented and successful work and will make great contributions to the workers in the field. I wish you success in your future work.

Q1. Which standard was used in FRAP? Please mention this in the manuscript.

Q2. What is the meaning of HRS? It is not mentioned properly. Please include it in the manuscript.

Q3. DPPH reading is at 520 nm, not 520 μ m. Change it.

Q4. The hydroxyl radical scavenging assay and FRAP assay were read at Nanometers (nm), not μ m. Correct it.

Q5. The proximate composition of the leaves of *A. leiocarpus* contains Lipid, Ash, and Carbohydrate, etc. The lipid content was 4.18, but what is the unit of 4.18? Example: mg/g, μ g/g, or %. Please include the unit for all the values.
