Potential competing interests: No potential competing interests to declare.

In general the paper is very good. The author is very clear. Maybe, the author could add more examples, in order to be more specific. Additionally, the author could add more references as follows:

González, B.A.R., Ibarra, G.N.F., Barbosa, O.G. *et al.* The Use of the Empirical Rule in the Probability Class: A Proposed Application for University Students to Determine the Type of Statistical Thinking. *Can. J. Sci. Math. Techn. Educ***22**, 521–537 (2022). <https://doi.org/10.1007/s42330-022-00237-y>
