Potential competing interests: No potential competing interests to declare.

1. The main title does not accurately mirror the content of the article.
2. The abstract lacks sufficient information. The background study, problem statement, identification of research gaps, articulation of aims/objectives, summary of methods, presentation of main results, and the novelty of the research study are not clearly delineated.
3. The gap of knowledge between the current article and published work is not clearly stated under the introduction.
4. The presentation of the methodology resembles a dense and lengthy laboratory report.
5. From the results and discussions, it is evident that the article lacks novel findings or meaningful contributions to the reader. It predominantly consists of data reporting without engaging in thorough discussions.
6. The article is better suited for a conference rather than a reputable journal.
7. Strongly advise rejection.
