Potential competing interests: No potential competing interests to declare.

The subject of the manuscript is very interesting. The manuscript needs a revision:

- The title is "*In-Vitro* Antibacterial Activity of some *Ganoderma* Species: A Review. However, in the first part of the text, you discussed the Diabetic Foot Ulcer. Thus, I suggest changing the title of the review or the structure of the text.
- Please add a title for Table 1 and change the title of column 2 from "Bacteria" to "Bacteria and fungi".
- The abbreviation of *Ganoderma* should be used.
- The scientific names should be in italics.
- The English language should be improved.

Best regards
