Review of: "Use of Digital Platforms Among University Students: A Systematic Literature Review"

Dalbir Singh[1]

1 Universiti Kebangsaan Malaysia

The proposed article is well-written and has the potential for a broad international readership. However, minor improvements exist as below:

1. What are the issues? Why is such a study needed? Justify with the latest and relevant references.

2. The methodology is well-elaborated and justified.

3. For Section 3.4:

3 (a) RQ3. What gaps exist in the current literature on the use of digital platforms among university students that future research can address?

3 (b) What are the related future research works? A detailed discussion is required based on Table 4.

4. What are the overall implications based on RQ1, RQ2, and RQ3? Suggestion to add a new section before the existing Section 3.5 Limitations. The "Recommendation" section can be merged with the suggested "Implication" section.

5. Section 3.5, Limitations, can be a part of the methodology. Please relocate.
