# Review of: "Treatment of Facial Ageing with Ozone Therapy: Clinical Case Report"

Shrook Khashaba<sup>1</sup>

1. Dermatology and venereology, Zagazig University, Egypt

- 1- The manuscript is well written, but the idea of the study isn't novel.
- 2- There is no mentioned method of assessment of improvement other than the clinical photographs; you can use one of the skin aging scores, for example, SCINEXA.
- 3- You should provide a detailed explanation of the improvement aspects in laxity, pigmentation, and fine lines to detect which aspect is better improved by Ozone.
