[http://I have just evaluated the paper titled "Financial Repercussions of Carbon Emissions and Depletion of Natural Resources: The Role of Fiscal Policy in Determining Health Expenditures". Although the study is prepared in a better way, however, I can propose some issues that are thought to be useful to increase the quality of the paper as follows: • In abstract, there is not policy recommendation \(s\) why? The abstract is the summary of the entire study • The introduction part is required to add few more sentences to increase the strength of this article and kindly bring in the research problem, objective, novelty and explain it in last paragraph of the section of Introduction. Vital studies are missing in the introduction section. Kindly consider the following studies <https://doi.org/10.1016/j.jclepro.2022.135778> <https://doi.org/10.1016/j.jenvman.2022.116884> <https://doi.org/10.1016/j.jclepro.2023.136127> • The literature review section can be expanded with including much more recent studies. The following studies will significantly enhance the study <https://doi.org/10.1016/j.jenvman.2022.116987> <https://doi.org/10.1016/j.scitotenv.2023.164115> <https://doi.org/10.1016/j.envpol.2023.121673> <https://doi.org/10.1016/j.jenvman.2023.118551> • Where is the limitation of the study as well as the direction for future study. The author \(s\) need to incorporate this. • The discussion section needs significant improvement. Kindly compare your findings with the following studies <https://doi.org/10.1016/j.jclepro.2023.137851> <https://doi.org/10.1016/j.seta.2023.103315> <https://doi.org/10.1002/sd.2658> • Add three more paragraphs \(at least of 250 words excluding the existing one\) in the section of conclusions mentioning the limitations of the study and remedies to limitations • Use of English language is very poor. Revise almost all sentences in the manuscript with appropriate use of grammar, punctuation and speech • Due to the a few grammatical errors in writing, I recommend to check once again the study fully from the beginning to the end in terms of editing and grammar.](#)
