**Potential competing interests:** No potential competing interests to declare.

The article is pretty good in nature and covered a very good topic. However, from my point of view, it has several limitations that, if addressed, could improve the manuscript's quality. Also, need to improve writing style and grammar.

1. Need to improve the Introduction and linking between the paragraphs.
2. Need to discuss the importance of the study.
3. Need to more focus on the methodological section and discuss it in detail.
4. The recommendation and conclusion are almost the same, but need to improve it.
