Review of: "Emotional Intelligence and Cybervictimization: Stratified Multilevel Analysis With Synthetic Data"

William Castro-Paniagua

Potential competing interests: No potential competing interests to declare.

Dear Editor

I appreciate the invitation to review the article.

Suggestions for the paper are:

The topic in question is novel because of the presence of the variable cybervictimization.

Add the sample number to the abstract.

The state of the art and methodology is adequately stated.

In the discussion, it is necessary to contrast previous studies, as well as with the theory proposed for the topic.

In the suggestions, add new issues arising from the study in question.
