Potential competing interests: No potential competing interests to declare.

Title : though it is catchy but at the same time it is giving false impression, as school leaders is a very broad term which includes the whole leadership of school, whereas in this study only the Principals of schools are interviewed.

The study would have been more interesting if other leaders of schools would have also been included.

Abstract: very well written. School administrators, does not only include Principal of school. You need to identify a better term.

Your manuscript needs the operational definition of the terms like school leaders, remote teaching, and school administrators. Otherwise these terms will confuse the readers.

Introduction: Doesn't have a strong story line to hook its readers.

Last three paragraph of introduction are mere repetition of same thing. Need to rewrite this segment.

Literature cited & Methodology:

Rule of manuscript writing. Kindly follow the below rules for your manuscript;

Use past tense when writing about prior research. Use past tense when stating results or observations. Use present tense when stating the conclusion or interpretations. Use present tense when referring to your study/paper.

The third paragraph of manuscript needs to be re-written. Manuscript writing has a typical language which is not followed.

The discussion part, the themes could have been tabulated with quote against each theme and suggestions adjacent column.

overall it is a good study, but there is a lot of repetition which needs to be rectified.
