Trilateral Retinoblastoma

National Cancer Institute

Source

National Cancer Institute. *Trilateral Retinoblastoma*. NCI Thesaurus. Code C7019.

Trilateral retinoblastoma refers to bilateral (or less often unilateral) retinoblastoma associated with an intracranial primitive neuroectodermal tumor in the pineal or suprasellar region. This syndrome is often associated with an increased familial incidence of retinoblastoma. (From Cancer 86(1): 135-141, 1999).
