

Review of: "Importance of diagnostic methods for round ligament leiomyomas in clinical practice"

Cihan Kaya

Potential competing interests: No potential competing interests to declare.

The paper is well-written, but before further evaluation the authors should further discuss other pathologies which mimic broad lig. fibrosis (see: doi: [10.5001/omj.2018.81](https://doi.org/10.5001/omj.2018.81)).
