Thank you very much. It looks like a very interesting manuscript.

1-) You can mention potential specialized answers of ChatGPT as a confounding factor.

As ChatGPT may know the previously asked programming questions.

2-) The following sentence may not be necessary.

Students, nearing the completion of their Bachelor's degree in "Information Systems" and only awaiting their thesis, estimated that in the absence of ChatGPT, they would have required at least double the time to accomplish the task.

3-) You can add more references to compare related to ChatGPT and its problem-solving capacities. For example, to my knowledge, ChatGPT can solve medical problems.

4-) You can explain potential confounding factors in your study and add suggestions to fix those potential confounding factors.
