Potential competing interests: No potential competing interests to declare.

This is an informative article on school adjustment and related variables. Some minor changes that can be considered are

1. In results section, " research question one' ..two are not suitable headings. Either remove them and proceed with paragraphs only or put. Heading that highlights the variables about which results are described
2. In Abstract there are two 'r ' s, one mentioned with scales as reliability index and one is for regression . Generally , mentioning reliability in Abstract isn't needed.
