### Introduction

In the following work I will carry out a review of the previously mentioned article. This will briefly encompass its general areas of opportunity, as well as some specific points that I consider to be relevant, as by changing them, the article, in its totality, will improve in the way it delivers its message to the readers.

### Review

1. **Orthography, Grammar:** Although it does not have millions of misspellings and errors regarding the order of the nouns and their adjectives, there are a few. For example, in the abstract, you cannot say *peoples*, it is just people or persons.
2. **Tables:** The footer (number of table and brief information of its content) of the tables should be below them, not above them.
3. **Comas and dots:** A comma and a dot can change the meaning of a whole sentence or paragraph.

I highly recommend to re-read the whole text to correct said errors, it would be an impactful improvement.

### Conclusion

Over all, it is certainly a good article, the topic is interesting, denotes a comfortable previous investigation, the type of vocabulary matches the intended audience, it just lacks a bit of carefulness in terms of writing and redaction, nothing that cannot be quickly fixed.
