

Review of: "Neuro-Fuzzy-Based Adaptive Control for Autonomous Drone Flight"

Iryna Hunko

Potential competing interests: No potential competing interests to declare.

1. It is advisable to improve the abstract of the article. Clearly state the goal and benefits of the proposed method.
2. Figures showing the results of modeling should be presented on a white or light background.
3. I advise you to make a more detailed review of articles published in the last 5 years.
