

Review of: "[Commentary] SBRT (Stereotactic Body Radiotherapy) in Recurrent Head Neck Cancer - Boon or Bane?"

Fernando Arias

Potential competing interests: No potential competing interests to declare.

This is an update on the role of SBRT in the re-irradiation of head and neck cancer. Clear conclusions are lacking in view of current knowledge and a classification of patients eligible for this technique, as well as those in whom SBRT is contraindicated, and it is advisable to also indicate patients with doubtful indications. However, it is a well-written paper and worthy of publication in your journal.
