Potential competing interests: No potential competing interests to declare.

The manuscript is certainly interesting, and the topic is very relevant. There are potentially very valuable lessons to learn from this manuscript. However, many issues need to be addressed before the manuscript is suitable for publication.

Overall:

1. There are many spelling errors in this manuscript. See the guide for authors for a free grammar checker. E.g.,etc.
2. Every time a new abbreviation is used, you should state the full name. E.g.,

Title: - "Development of a Curriculum for Emergency Physicians to Teach Transesophageal Echocardiography for Cardiac Arrests: A Kern Six-Step Model," a brief phrase describing the contents of the paper.

Abstract should be informative and completely self-explanatory, including the following structures: -

- 1. Introduction:** Please describe the problem or lack of knowledge that is addressed by this study.
- 2. Aim of the study:** relevant.
- 3. Methods:** Please add the study methodology that is used in this study.
- 4. The result:** - should be presented with clarity and precision.
- 5. The conclusion** should relate to the aim and problem that are described under introduction and aim.
- 6. The keywords** are following the abstract, use about five to 10 keywords not mentioned in the title, and no abbreviations.

Introduction

1. The introduction is ideally in structures.

Methods

1. The methods section should be written in a way that everyone could repeat this study in the same manner.

Discussion

1. A discussion should offer a short overview of the results and an in-depth discussion of the interpretation of them.
2. Do the authors have an explanation for why the results are different compared to other studies?

Conclusion:

Is logic in manner and relevant.
