This is an amazing and easy-to-read article on the history of social work. The article has summarised the history of social work in a nutshell. At the same time, the article has highlighted some lesser-known facts about the history of the profession, such as the role of Chinese traveller Fa-Hien in recording and disseminating some key information. The article is the first of its kind. Congratulations to the author, Dr. V. Sethuramalingam, for writing this much-needed article.
