**Potential competing interests:** No potential competing interests to declare.

The manuscript titled "*The Nexus between Energy Policies and Supply: A Descriptive Evaluation of Nigeria and UK Energy Sectors*" has been read, and the theme of the study aligns with global economic trends. Before it can be considered for publication, the work must undergo substantial revisions.

1. **Introductions:** This part lacks uniqueness, specifically the rationale based on prior literature; hence, your novel technique is required to fill the void. Lastly, the highlighted contribution to the body of knowledge is insufficient.
2. **Literature review:** The part is dense with information, but it lacks relevance to the literature on energy efficiency and environmental quality. Consider the literature on energy efficiency and environmental quality to enhance this section. Here are few suggestions:

7. **Methodology and discussions:** The tables and graphs do not correspond. Maintain uniformity. Finally, correlate your findings with prior research.
8. **Conclusion and policy implication:** This area should be enhanced with a more concrete recommendation.
