Comment

1. Abstract has no methodology (how the papers were collected) and no main findings indicated. There are incomplete sentences, and the English of the manuscript should be improved. No conclusion and future prospect are indicated in the abstract.
2. Introduction needs a motivation why the review is undertaken. In addition, authors should indicate the existing research regarding Shilajit. What are synonyms? Authors should describe the plant *Asphaltum punjabianum*. There should be a clear definition of Shilajit as it is indicated in various names. Please italicize scientific names.
3. The manuscript lacks methodology, data inclusion criteria, year of publications, search engines, and the like.
4. Please write detailed information regarding the phytochemical and pharmacological properties of Shilajit. The narration given is not as detailed as it should be. Try to search available literature and enrich your findings. Anti-AIDS activity???? May you change the title? Indicate the minerals found with quantifying data.
5. Conclusion: In this compilation, you'll find the most well-known and established pharmacognostic investigations, offering comprehensive details on both. Rewrite!
6. Check spacing, line space, and justification!
