Potential competing interests: The author need to highlight the Contributions in the end of Introduction section. - In Literature Survey section, some of the sentence needs to be modified in understanding way and mentioned with the author name and reference no. ect., - Moreover, the advantages and disadvantages to be mentioned in each work and inference of the same need to be discussed with the justification. - Need explanation about the proposed model with algorithmic style/ Steps/ Procedural steps. - Novelty section need to added and explained - Wherever necessary to add flow diagram/architecture etc., - If possible the result section may be improved/enhanced with some more results. - Minimum 4 to 5 results with the comparison of the proposed and existing may be added. - The work must be concluded properly with the highlight of achievement and comparative analysis result. In conclusion, novelty need to be highlighted also quantified. - All the formulas need to be mentioned through formula no. - All the tables need to be mentioned with table no. and table name, the table name always above the table. - The tabulated information can be represented in the form of graph -All the figures need to be mentioned with figure no. and always below the figure name should be mentioned below the figure and explain the figure with the X and Y axis.

The author need to highlight the Contributions in the end of Introduction section.

- In Literature Survey section, some of the sentence needs to be modified in understanding way and mentioned with the author name and reference no. ect.,
- Moreover, the advantages and disadvantages to be mentioned in each work and inference of the same need to be discussed with the justification.
- Need explanation about the proposed model with algorithmic style/ Steps/ Procedural steps.
- Novelty section need to added and explained
- Wherever necessary to add flow diagram/architecture etc.,
- If possible the result section may be improved/enhanced with some more results.
- Minimum 4 to 5 results with the comparison of the proposed and existing may be added.
- The work must be concluded properly with the highlight of achievement and comparative analysis result. In conclusion, novelty need to be highlighted also quantified.
- All the formulas need to be mentioned through formula no.
- All the tables need to be mentioned with table no. and table name, the table name always above the table.
- The tabulated information can be represented in the form of graph -All the figures need to be mentioned with figure no. and always below the figure name should be mentioned below the figure and explain the figure with the X and Y axis.
