Potential competing interests: No potential competing interests to declare.

The article provides a coherent view of emergence of AI and its impact on organizations. It is well researched for analysing the different dimensions of impact of AI on organisations. The potential perceived risk of impact on employment is highlighted. The authors also compliment the Growth of AI and its usefulness to efficiently mitigate some of the problems faced by organizations. The article is more for general reading than a specific research focus on stating a problem and delving deep to analyze the issue in hand. This can serve as an introduction to probing further on productivity and efficiency.
