

Review of: "Skin related health issues among health care workers due to utilizing of personal protective equipment during COVID-19 pandemic in Pakistan"

SENOL DANE

Potential competing interests: The author(s) declared that no potential competing interests exist.

In my opinion, the article is well designed. It is suitable for publication. However, I would like to point out some issues.

Skin symptoms in Covid-19 are also likely to be closely related to patients' fears and anxieties. In this respect, it is necessary to refer to new studies on mental problems caused by Covid-19. For example
