Multicarotenoid Supplement MCS-8

National Cancer Institute

Source

National Cancer Institute. *Multicarotenoid Supplement MCS-8*. NCI Thesaurus. Code C121859.

A supplement containing multiple, as of yet undisclosed, carotenoids, with potential chemopreventive activity. Upon oral administration of the multicarotenoid supplement MCS-8, the carotenoids may be able to exert their chemopreventive activity through multiple mechanisms of action.
