I have the following comments:

1. In the "Introduction" and "Materials and Methods" sections, authors should add more papers about this issue, such as :
 - DOI: [10.46481/jnsps.2022.843](https://doi.org/10.46481/jnsps.2022.843)^[1]
 - DOI: [10.1109/IRASET57153.2023.10152923](https://doi.org/10.1109/IRASET57153.2023.10152923)^[2]
2. you need to split table 1 into two tables (Table 1: before... and Table 2:after) and add an analysis for each table for more details
