ABSTRACT- The structured abstract is correct

INTRODUCTION- The main objective of the research is clearly expressed from the beginning of the article- The written text is consistent- The Research Questions are clearly defined, well justified and verifiable

METHOD- The methodology section appears properly organized- The experimental design is appropriate- Instruments are identified.- It would be interesting to know more characteristics of the sample used in the study.- The procedure is correct for achieving the targets set in the research and is described in detail to permit replication of the study-The description of the analysis of data is suitable- The ethical aspect of research is not indicated. It is necessary to complete this aspect

RESULTS-The results, suppose a contribution to the psychological literature and justify the investigation-The description of the analysis techniques is suitable

DISCUSSION-The interpretation of results is consistent with the research problem included in section introduction,However, it would be more enriching for readers to respond to each of the hypotheses raised in the study and relate the results to the scientific literature.This is missing especially with the second objective- Besides, The Study Limitations are not explained and The implications for future research are not covered.
