# Review of: "Application of Ensemble Learning for Respiratory Ailment Diagnosis: Case Studies on Biomedical and Chest X-ray Image Datasets"

Nijalingappa Pradeep<sup>1</sup>

1. CS and E(Data Science), Bapuji Institute Of Engineering & Technology, Bengaluru, India

The article is complete in all aspects. The sections Abstract, Introduction, Literature Review, Proposed Methodology, Results, and Discussions are clearly articulated. However, the authors can identify and highlight gaps identified from the literature review along with substantial proof to demonstrate that the gaps that have been identified have been closed.
