

Review of: "Entrepreneurship education in the Tanzanian higher education institutes: The learning theories perspective"

Gongxiong Jiang

Potential competing interests: No potential competing interests to declare.

This is an interesting topic, but there are still some problems in this study.

1. You mentioned in the introduction that section 3 of the article should be the methodology and approach, and then study findings. But I didn't find the content about methodology and approach in section 3.
2. The abstract describes too much about the research background, but we still don't know what conclusions you have drawn. The conclusion in the abstract can be brief, but it cannot be absent.
3. In the introduction, the author did not clearly give the research gap compared with the previous studies, which makes me unclear what the specific contribution of the article is.
