FibroTest Score Measurement

National Cancer Institute

Source

National Cancer Institute. *FibroTest Score Measurement*. NCI Thesaurus. Code C105443.

A patented biomarker test (APHP, 2001) that measures liver pathology through the assessment of a six-parameter blood test (for alpha-2-macroglobulin, haptoglobin, apolipoprotein A1, gamma-glutamyl transpeptidase, total bilirubin, and alanine aminotransferase), taking into account the age and gender of the patient.
