Potential competing interests: No potential competing interests to declare.

This topic is of great importance and needs more research. However, I suggest making some edits to improve the quality of the article:

- The theoretical basis is very broad and general. I recommend reducing it and identifying the main aspects related to this investigation.

Determine the methodological design and indicate how the questionnaire will be validated.

How much the sample size? What are its demographic characteristics?

I recommend discussing the results of this article with the results of previous studies.

What are the benefits and contribution of this investigation to the educational field?
