

Review of: "The Role of Plant Growth-Promoting Bacteria (PGPB) in Soil Fertility Restoration in Chemical-Contaminated Areas"

Jazmin Vanessa Perez Pazos

Potential competing interests: No potential competing interests to declare.

The topic of the article is very interesting, however, as it is currently presented it does not present anything new, it is necessary to go deeper and do a more detailed review of the bibliography that must also be updated. It is suggested to do a thorough review and focus the article on some new topic so that it can be truly relevant for publication.
