

# Review of: "Influence of Institutional Factors on Job Satisfaction among Nurses at a Regional Hospital, Ghana"

Sushil Kumar Shukla

Potential competing interests: No potential competing interests to declare.

## Comments:

1. How 233 Nursing Professionals were selected- Not clearly defined?
2. Why Simple Random Sampling is used for selection of responded if the researcher is supposed to take all Nursing professional who are continuously working since last two years?
3. Researcher may use the Logistic Regression Model to get the better prediction of Job Satisfaction over other independent variables

**Final decision:** Article can be published with the clarity of points 1 and 2.
