

Review of: "Application of Data Mining Combined with K-means Clustering Algorithm in Enterprises' Risk Audit"

Neepea Biswas

Potential competing interests: No potential competing interests to declare.

1. Role of big data is not relevant here.
2. Novelty of this work is not found.
3. It is preferred to use the full phrase "data mining." Data mining is not any technology.
4. Do not use the short form of big data
5. It is not any figure (Figure 6)....it is an algorithm.
6. Overall organization of the paper is not standard.
