Dear author

This study is practical and valuable. Please take the time to read and incorporate these comments to enhance its potential.

1. The introduction is weak, and I failed to recognize the necessity of your study. Please provide more details about your content, paying special attention to the necessity of your study.
2. I believe that multi-stage random sampling is a superior choice compared to stratified random sampling. Could you please elaborate on the reasons behind not opting for this approach?
3. I have come across information indicating that you developed a scale for assessing sex education awareness. Given that creating a questionnaire is a structured process, could you please provide more details regarding its development? Specifically, I am interested in understanding the procedures employed to ensure content validity, construct validity, and reliability.
4. What were your inclusion criteria?
5. Ethical considerations are needed.
6. In the results section, kindly incorporate analytical results. While the obtained results seem promising for your specific samples, it is advisable to utilize statistical tests that enhance the generalizability of your study if you intend to publish it in international journals.
7. Limitations and implications of your study are necessary in the discussion.

Kind regards
