**Potential competing interests:** No potential competing interests to declare.

Intresting paper, in my opinion it can be published once the following remarks are taken into consideration:

1. INTRODUCTION: the food choice motives recent papers should be addresses i.e. a recent review: "Exploring the impact of COVID-19 pandemic on food choice motives: a systematic review, sustainabliity, 2023, 15, 1606/  
[doi.org/10.3390/su15021606](https://doi.org/10.3390/su15021606)
2. LIMITATIONS of the study: should be addressed in the method section
3. DESCRIPTION OF THE TOWN OF KIRA: irrelevant paragrapgh and picture, should be delated
4. DESCRIPTION OF THE SELECTION OF THE PARTICIPANTS: more detailed selection process of the participants in the study
5. MOST IMPORTANT: Only 70 participants is an inadequate number and should be increased at least to 150 participants for a valuable data information
