Lactobacillus acidophilus/Estriol Vaginal Tablet

National Cancer Institute

Source

National Cancer Institute. *Lactobacillus acidophilus/Estriol Vaginal Tablet*. NCI Thesaurus. Code C97257.

A vaginal tablet containing a low dose of the estrogen hormone estriol and lyophilized lactobacillus acidophilus, with hormone replacement and vaginal flora restoring activity. Upon vaginal application, estriol may restore estrogen levels locally and may relieve symptoms caused by estrogen deficiency; the Lactobacillus acidophilus may be able to restore the vaginal Lactobacillus flora.
