Melanoma of the Conjunctiva Pathologic TNM Finding v7

National Cancer Institute

Source

National Cancer Institute. *Melanoma of the Conjunctiva Pathologic TNM Finding v7*. NCI Thesaurus. Code C88614.

A pathologic finding about one or more characteristics of melanoma of the conjunctiva, following the rules of the TNM AJCC v7 classification system. Complete resection of the primary site is indicated. Histopathologic evaluation for negative peripheral and deep margins should be performed. To best judge the depth of penetration of the tumor, sections should be made perpendicular to the epithelial surface. (from AJCC 7th Ed.)
