

# Review of: "Pros and Cons of Key Escrow Agreements in Cloud"

Komal Pursharathi<sup>1</sup>

<sup>1</sup> Maulana Azad National Institute of Technology

**Potential competing interests:** No potential competing interests to declare.

Few concerns that must be addressed for any possible recommendation:

1. The method of cloud-based encryption, BYOK, and HYOK could be illustrated by showing their working.
2. Add Objectives of the paper at the end of Introduction.
3. Motivation and Contribution of the paper needs to be included as next Section, after introducing research objectives.
4. Correct the Spelling of privileges on page 7.
5. The article needs proofreading and effort to correct grammar and punctuation. Some words are missing their articles (a, an, the). Some punctuation characters are missing, and some are redundant.
