

Review of: "Assessment of Quality, Bacterial Population and Diversity of Irrigation Water in Selected Areas of Minna, Niger State, Nigeria"

Abdul Bari Jabar

Potential competing interests: No potential competing interests to declare.

The Methodology of the paper needs to be explained in detail. About the bacterial identification, the bacterial names which are given in the tables need to be elaborated in detail.

For irrigation water quality assessment, SAR, RSC, KR, SSP, PI, etc., are needed.

The standard methods to be adopted to examine the water are APHA standards.

The regression analysis needs to be made for the relationship between Water Physical, Chemical, and Bacteriological Properties.
