# Disintegrin and Metalloproteinase Domain-Containing Protein 15

National Cancer Institute

## Source

National Cancer Institute. *Disintegrin and Metalloproteinase Domain-Containing Protein 15*. NCI Thesaurus. Code C17986.

Disintegrin and metalloproteinase domain-containing protein 15 (863 aa, ~93 kDa) is encoded by the human ADAM15 gene. This protein is involved in cell-cell interactions, extracellular matrix protein metabolism and cell adhesion.
