

# Review of: "Development of a Mobile Application for Flag Identification based on Artificial Neural Networks"

Dr. Dhananjay Bisen

Potential competing interests: No potential competing interests to declare.

There are some points needed to be addressed to improve the quality. The research paper needs the following revisions, after which the paper's final decision will be made. Please kindly find my comments as follows:

1. The section for the overall technique analysis should be added to the manuscript.
2. Add a future scope to the paper.
3. The importance of the problem considered in this paper should be further addressed.
4. Please check all notations and equations carefully. Moreover, the usage of English should be improved.
